

FREGUESIA DE VILA NOVA DE MILFONTES

Município de Odemira

INFORMATION

Due to the measures taken at a Council of Ministers meeting, where a regression in the confinement measures of the Municipality of Odemira was determined, this due to a high rate of epidemiological incidence in the cases of Covid-19, largely caused by the high numbers of population foreigners heading to this territory, due in part to the growing need for agricultural workers in the harvest period that is now beginning, but also for reasons of obtaining legalization to stay in Portugal (and in the Schengen area), and without these considered in the calculation of the number of residents to determine the degree of incidence of the pandemic, this Parish Council will not issue residence certificates to the new population that is intended to settle in the territory, except for current residents, until the Government considers the particularities existing in Odemira and reevaluate the measures adopted, removing these temporary residents from the official count of Covid positive case numbers 19, thus respecting all economic activities that are being severely affected by these measures, and which are largely the basis of the local economy.

Vila Nova de Milfontes, 19 de abril de 2021

O Presidente da Junta de Freguesia,
